Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2 and 4-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Farmerie (5,212,887).

Regarding claim 1, 2, 5, 6 and 7, Farmerie teaches a reciprocating power saw having a housing, a motor-driven reciprocating stroke bar (62) with a tool receptacle arranged at a free end of the stroke bar (62), and a bearing means (82) bearing the stroke bar (62) in a tool-side end zone of the housing axially displaceable and pivotable, wherein the bearing means (82) has a guide part with a bearing passage for receiving the stroke bar (62), and wherein the bearing means (82) is mounted in a receiving passage (see attached Fig. 2) in the housing by an elastic secondary bearing element (92), and wherein the secondary bearing element (92) is a circular ring and has a circular cross-section, and wherein the receiving surface has a bearing groove for receiving the secondary bearing element. See Figs. 2, 5 and 6.

Regarding claim 4, Farmerie teaches a guide part having a counter bearing groove for receiving a secondary bearing element 92. See attached Fig. 2.

Regarding claim 8, see attached Fig. 2.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farmerie in view of Bednar et al. (US Pub. 2001/0034941 A1), hereinafter Bednar.

Regarding claim 9, Farmerie teaches the invention substantially as claimed except for a seal in the bearing means 82. Bednar teaches a seal 163 for a bearing means for preventing debris entering the saw housing. Therefore, it would have been obvious to one skilled in the art to provide the bearing means of Farmerie a seal as taught by Bednar to prevent debris entering the housing.

Regarding claims 10 and 11, a groove for receiving the seal 163 is best seen in Fig. 2 in Bednar.

Response to Arguments

5. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.
